

# **Bianco Pumpz** BEST IN CLASS ENGINEERING

# WHAT IS BEST IN CLASS ENGINEERING?

Bianco Pumpz evolved from an industry need for a high quality pump solution products in 2004.

The range of Bianco Pumpz provides the Australian, New Zealand, Pacific and Asian market places an engineering pump solution.

We deliver dependable, innovative, quality, engineered performance pumps that are energy efficient for todays requirements.

Bianco Pumpz and iCON controls will provide a value for money water solution for your business, we call it Best in Class Engineering.

Bianco Pumpz and iCON control products service the:

- Irrigation markets (water pump and solar solutions)
- Residential markets (household pump systems and rain harvesting)
- Commercial markets (water pump and drainage solutions)
- Industrial markets (wastewater and sewer solutions)

Bianco Pumpz and iCON controls a solution for now and future water needs.

Disclaimer: Every effort has been made to publish the correct details in this brochure. No responsibility will be taken for errors, omissions or changes in product specifications.

# INNOVATION

- Bianco Pumpz' innovative technology, known as iCON, spans beyond pumps and is now featured across our iCON Control range.
- iCON Drives, iCON Pumps, iCON iPRESS.
- iCON Packaged Pump Stations for your sewer and water applications.
- We have an innovative iCON water solution for your business requirements.

# 

- Bianco Pumpz and iCON controllers optomise the best in world class engineering quality standards.
- Every shipment is checked and inspected according to meet Australian & New Zealand standards.
- Partnering with manufacturing specialists in China to ensure our products arrive in Australia at the highest quality.

- Engineering designs for Australian requirements.
- Tooling owned by White International.
- Quality bearings and high quality approved seals.
- Stainless steel shafts.

- Stringent assembly quailty control process for Bianco and iCON products.
- Series 2 pumps use high quality motor designs.
- Advanced hydraulic design for maximising flow rates.

# **CON iPRESSPRO**

### Introducing the Bianco iPRESSPRO...

The BIA-iPRESSPRO is a device used to control electric 240V pumps of 2.2kW or less. The controller monitors both the pressure and the flow. There is no need for a separate (expansion) pressure tank (except when used in mode 2). The unit will protect the pump should the water supply fail (due to a blockage in the pipe or tank running dry) and will automatically restart normal operation once water is restored.

The iPRESSPRO is the first electric pump controller with a fully adjustable cut in (start) pressure of between 0.5-6.0 bar and a cut out (stop) pressure of between 0.8-9.8 bar. The iPRESSPRO has the ability to operate as either a standard auto restart pressure controller (start pressure to be set - no pressure tank required, Mode 1) or an automatic restart loss of prime pressure switch (start and stop pressure to be set - pressure tank required, Mode 2). The iPRESSPRO enables the home owner full control of the pressure system.

The iPRESSPRO includes a lockout system to prevent unauthorised adjustments and is supplied with power leads.

### **Stainless Steel** Jet Pump Pressure Systems

Fully electronic high performance self-priming pumps designed for domestic water supply for urban and rural water storage tanks. Designed completely from non-ferrous materials to impede the effects of corrosion.

Automatic electronic pump control provides constant pressure at low to full flows and provides dry run protection. The auto restart function will restart normal operation when water is restored. Automatic control incorporates electrical surge protection, rotatable pump connection and in-built check valve.

### Stainless Steel Horizontal Multistage Pressure Systems

Corrosion resistant stainless steel construction. Ideal for domestic water supply for small and large homes, irrigation, car washing and general water transfer systems.

Automatic electronic pump control fitted and wired, starts and stops the pump automatically when a tap is turned on or off.

Automatic control incorporates electrical surge protection, rotatable pump connection and in-built check valve.

Horizontal multistage for quiet and efficient pumping.

### **Performance Curves**

### Peripheral Turbine Cast Iron Pumps

The Bianco Series 2.0 end suction Peripheral Turbine Pump is an ideal device for low flow applications.

They are especially suited as jacking pumps, commercial and industrial washdowns as well as domestic gardening. They are also ideal for tank water transfer.

Suitable for clean water and in applications where there is flooded suction.

Peripheral Turbine Pumps have the following features:

- Corrosion resistant pump body and impeller to ensure pump durability
- Cataphoresis<sup>1</sup> treatment of pump body for rust prevention to ensure no water discoloration or suspended particles
- High quality mechanical shaft seal and high quality bearings
- 240V single phase TEFC motor with in-built auto reset thermal overload to prevent overheating of the pump.

### Rain Harvesting Systems

### Rainsaver MK6 Pressure Systems

#### **Rainsaver MK6 Features:**

- Requires no power supply and consumes no electrical energy
- Designed to further save water resources by reducing incoming mains to 200 kPa
- Requires no weather proofing
- · Can be mounted any distance from the pump underground or inside a tank
- UV stabilised technopolymer for long life and aesthetics
- All Rainsaver MK6 pumps are independently controlled to regulate flows and pressures whilst protecting the pump against voltage fluctuations, loss of water and incorporate a 24 hour automatic pump restart

### **Submersible Pumps Vortex Drainage Pumps**

IANCO PUMPZ

**BIA-B18VAS2** 

#### The B Series Vortex Pumps are characterised by:

- · Cast iron pump body for durability
- · Automatic float switch
- · Triple seal system: Dual Mechanical Seal (carbon/ceramic) and oil seal
- Handy carry handle
- Includes universal hose tail adapter
- · 240V single phase motor with in-built thermal protection
- 10m H07RNF neoprene chemical and oil resistant cable

#### For use in:

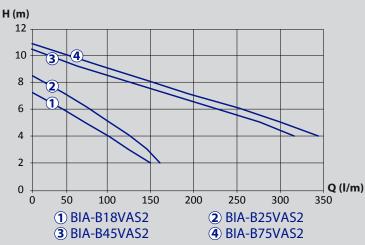

- · Dewatering of cellars, ditches, pits, ponds and drains
- Pumping stormwater and waters with non-abrasive soft solids, hair and stringy materials in suspension
- Ideal for greywater pump out and flooded irrigation, sump emptying, septic transfer and pumping of light slurries.
- Particle sizes up to 15mm (B18VAS2, B25VAS2), up to 25mm (B45VAS2, B75VAS2)

### Submersible Pumps Drainage Pump with High Head

Submersible high head pump designed for AWTS and rainwater tanks. Fitted with Noryl impellers and stainless steel strainer.

#### **Applications:**

- Domestic pressure systems
   (with optional Press Control)
- Pumping Clean and pre-treated water.
- AWTS Automated Water Treatment Systems pump out to dripper beds.
- De-watering of cellars, basements and garages.

#### **Special features:**

- Glass Filled Nylon pump body and Stainless Steel cover for strength and lightness.
- · Easy grip, nylon carry handle.
- Triple seal system: Dual mechanical seal (Carbon ceramic) in oil bath and Oil Seal
- 3 Stage High Head pump with durable Noryl impellers.
- Elevated (88mm) suction intake with Algae-proof slotted strainer.

- 10m Power lead and automatic Float Switch
- All cables to H07RNF standard.
- 240V Single Phase , 0.55kW
- · Built in auto-resetting thermal overloads

#### **Benefits:**

Designed

for AWTS

- Strainer design improves water flow and prevents blockage from algae growth.
- Elevated intake draws oxygenated water from higher in tank and avoids sludge layer.
- Leads to improved water quality with lower algae and anaerobic matter for better smelling water and cleaner clothes washing.
- Quality pump materials assist with longer pump life while still being light to lift and lower.
- High Head pump with low energy usage

### Drainage Pump with Internal Float Switch (clean water use)

Light and compact submersible clean water pump.

Supplied wired and ready to install. Ideal for pits or confined spaces where floats do not work. Incorporates float on/off switch for manual and automatic level control.

The pump has an internal float switch which will not foul and allows for installation in small sumps.

(min size 260mm x 160mm x 330mm deep).

When switched to manual mode, the scavenger type base allows pumping down to 5mm.

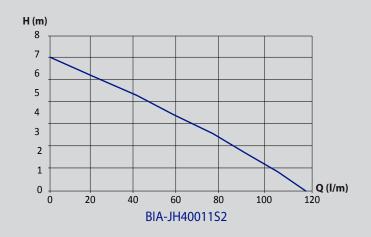

Not suitable for construction sites, ponds, fountains or biotreatment. Pump Dimensions: 203 x 321mm

### Waste Water / Sewage Pumps Grinder Pumps

The B120GS2 & B120GMS2 is a new generation grinder pump for use in waste water applications containing soft solids. The pump is designed to grind various materials for pumping to sewer mains or treatment facility. It has a dual ceramic/graphite mechanical seal and H07RNF neoprene chemical and oil resistant power cable. The grade of stainless steel for the Shaft: 304 cutting device Stainless steel 7CR17. The grinding device is replaceable and manufactured from high chromium hardened stainless steel for reliability and long life. Coupling device available for rail mounting:

#### **Applications:**

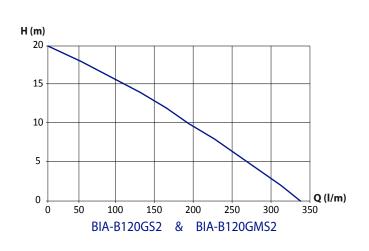

- Grey & Black Water Pumping
- Sump Emptying
- Septic effluent and sewage disposal
- · Pumping of waste water with soft solid in suspension

### Waste Water / Sewage Pumps

### **Positive Displacement Grinder Pumps**

Positive Displacement Grinder Pump with a heavy duty cutter and cutter ring used to treat unstrained waste waters in "low" flow, high head applications.

#### **Special features:**

- Cast iron pump body for durability under harsh conditions
- Available in single phase and three phase, with and without a float
- Heavy duty silicon carbide mechanical seal
- Cutter with cutter rings cuts solids to smallest possible size to reduce clogging
- Used for unstrained wastewaters
- Perfect for low pressure sewer applications
- Packaged Pump Stations also available

### Light Construction Pumps

Submersible drainage pump fitted with semi-vortex, urethane coated impeller plus agitator, supplied wired and ready to install. The pump has a dual mechanical seal in oil chamber and can handle particles to 25 mm x 10mm.

#### **Special features:**

- Corrosion resistant pump components
- Fully automatic operation
- Dual Mechanical Seal in oil bath, SIC/SIC, Carbon Ceramic
- Urethane coated semi-vortex impeller allows pumping of suspended solids, sandy and stringy material
- Agitator on the end of the pump shaft helps prevent air locking and clogging
- Carry handle
- Versatile outlet connection.
- 240V single phase motor with in-built auto reset thermal overload.
- 10m of power cable.
- 12 months warranty.
- Suitable for construction sites, stormwater, basements.
- Urethane strainer resists damage

### Centrifugal Pumps Cast Iron Centrifugal Pumps

Horizontal single stage\* cast iron centrifugal pumps supplied ready to install. Used especially for water transfer. (\*FCT is twin stage)

#### The pumps are characterised by:

- Corrosion resistant cast iron pump body and bracket cover with cataphoresis<sup>1</sup> treatment, and 304 stainless steel impeller and shaft.
- Mechanical shaft seal.
- TEFC motors.
- Motor support foot.

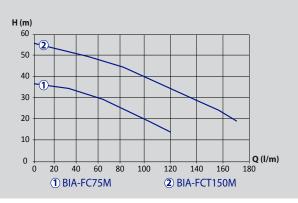

#### **Applications:**

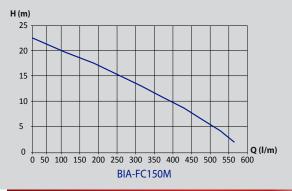

Suitable for industrial washdown, water transfer and tank filling. Suitable for fire fighting, HVAC, circulation and pressure boosting.

<sup>1</sup>Cataphoresis is an electrochemical coating process for metallic surfaces widely used in the industry due to its penetration and long life, either as a priming coat or finished paint for corrosion resistance.

Model	ltem Code	Features
BIA-FC75M	802805	0.75kW, 1.0hp, 240V, max head 37m, max flow 119L/m. Ports 1"BSPF In, 1"BSPF Out.
BIA-FCT150M	802816	1.5kW, 2.0hp, 240V, max head 56m, max flow 170L/m. Ports 1-1/2" BSPF In, 1" BSPF Out.
BIA-FC150M	802806	1.5kW, 2.0hp, 240V, max head 22.5m, max flow 559L/m. Ports 2" BSPF In, 2" BSPF Out.

### **Centrifugal Pumps**

**Close Coupled, Stainless Steel,** Single Stage Centrifugal Pumps

Suitable for water circulation, car washing, tank emptying, gardening, fountains, irrigation and vat washing.

#### **Special Features:**

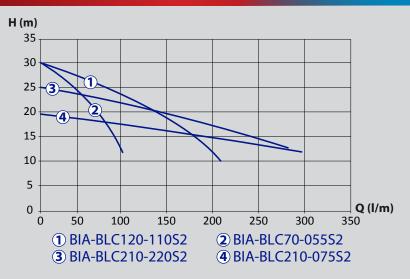

- Light weight
- · Noiseless and reliable operation
- High Performance
- Water temperature up to 85°C
- Constructed from AISI 304 Stainless Steel
- · Corrosion resistant

### BIA-C2060-150, BIA-C280-180 and BIA-C3280-180

These pumps are used for domestic hot water circulating. The stainless steel housing makes them suitable for drinking water use and underfloor heating. They are maintenance free and are low in noise. Supplied complete with unions.

## **Circulator Pumps**

### **iCIRC** Circulator

This is a pump used for domestic hot water circulating. The stainless steel housing makes it suitable for underfloor heating. It is maintenance free and is low in noise. Supplied complete with unions.

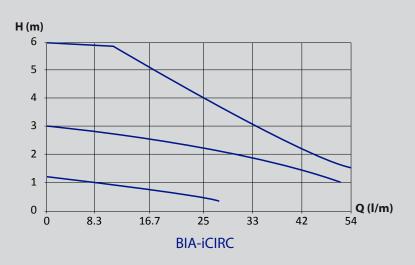

The integrated variable speed drive automatically adapts the circulator to each system's demand, only operating the pump at the necessary speed to run the system. This energy efficient circulator also has the highest efficiency rating 'A' in the industry, saving customers money all day every day.

### **Pump Selection Guide**

SPRINKLER

Appliances likely to operate a	~	
Toilet	9 l/min	
Shower	10 - 15 l/min	
Water Saving Shower Head	6 - 7 l/min	
Household Tap	10 - 15 l/min	
Dishwasher	15 l/min	
Washing Machine	10 - 15 l/min	
Garden Hose	20 l/min	
Lawn Sprinkler	10 - 15 l/min	

\*Add up the amount of water used by all appliances in your home that are likely to be operating at the same time, i.e. Suppose that you have 3 appliances used at once = Tap, Washing machine and a Shower. Adding up the amount of water used by these 3 is: Tap (10 - 15 l/min) + Washing Machine (10 - 15 l/min) + Shower (10 - 15 l/min) = TOTAL of 30 - 45 l/min.

Water Pressure Systems	~		~
Cottage 10 - 20 l/min		Small House 20 - 30 l/min	
Medium House 30 - 50 l/min		Large House 50 - 90 l/min	

Requirements	~		~		~		~
Household Pressure		Garden Sprinkler/s		Washdown		Drainage	
Tank Filling		Irrigation		Sewage			

Water Source	~		~		✓		~
Dam		Bore		Spear point		Tank	
Aboveground		Inground		River		Town Mains**	

\*\*If mains are different times of the day, require 3 separate pressures.
