The Grundfos CM Booster self-priming pump with PM2 pressure manager is a compact booster solution for water supply in domestic applications. The pressure booster unit consists of a Grundfos CM self-priming pump and a Grundfos PM2 pressure manager. The pressure manager allows the pump to start and stop automatically according to demand and protects the pump from dry running.

The CM Booster self-priming pump can create a suction lift of up to 8 m, and it is very easy to install. When the booster has been

it is very easy to install. When the booster has been connected to the pipework, just plug it into a socket, and the system is operational.

Features

- compact
- easy installation
- self-priming up to 8 m
- automatic resetting of alarms
- dry-running protection
- anti-cycling (leakage detection)
- maximum continuous operating time.

Applications

The Grundfos CM Booster self-priming pump with PM2 pressure manager is mainly used for domestic and light commercial water supply or booster systems.
